The *International Economic Review* is a monthly staff publication of the Office of Economics, U.S. International Trade Commission. The opinions and conclusions it contains are those of the authors and do not necessarily reflect the views of the Commission or of any individual Commissioner. The *Review* is produced as part of the Commission's international trade monitoring program. Its purpose is to keep the Commission informed about significant developments in international economics and trade, and to maintain the Commission's readiness to carry out its responsibility to provide technical information and advice on international trade matters to policy-makers in the Congress and the Executive branch. The *Review* is available to Government officials outside the Commission on a request basis. Inquiries or comment on items appearing in the *Review* may be made directly to the author, or to:

## INTRODUCTION

*About Chartbook*

CHARTBOOK is published annually by the Office of Economics of the U.S. International Trade Commission to make available to the Congress, the Executive Branch, and the public, information on the composition, value, and direction of U.S. merchandise trade with the world and its major trading partners for the years 1986-90.

This edition of CHARTBOOK contains information on U.S. trade with geographically related economic regions and trade with individual countries. The following tabulation presents the economic regions and individual countries included in this edition.

<i>Economic regions</i>	<i>Individual countries/territories</i>		
• North America	• Canada	• South Korea	• Poland
• European Community	• Mexico	• Taiwan	• Hungary
• Pacific Rim	• Germany	• Argentina	• Yugoslavia
• Latin America	• United Kingdom	• Brazil	• Switzerland
• U.S.S.R. and Eastern Europe	• France	• Colombia	• Israel
• All other countries	• Italy	• Venezuela	• India
	• Japan	• U.S.S.R.	• Saudi Arabia
	• China		

*Definitions*

The data presented in CHARTBOOK includes trade in *merchandise* only. Trade in services is not included, except as noted.<sup>1</sup> This publication is prepared from data compiled from official statistics of the U.S. Department of Commerce contained in the CENSUS trade database,<sup>2</sup> unless otherwise noted. Imports are Census-basis<sup>3</sup> imports for consumption at customs value. Exports are Census-basis domestic exports at f.a.s. value. All values are presented in billions of U.S. dollars except as noted.<sup>4</sup> Because

<sup>1</sup> Only one chart, "Comparison of the U.S. current account balance to the U.S. Federal budget deficit, 1970-90," on p. 11, contains trade in both merchandise and services in the current account balance data.

<sup>2</sup> This database is maintained by the U.S. Department of Commerce, International Trade Administration, at the National Institutes of Health (NIH) Federal Data Processing Center. Since January 1, 1989, U.S. trade data have been collected on the basis of the product subheadings of the Harmonized Tariff Schedule of the United States (HTS). Data for years prior to 1989 were originally classified under the former Tariff Schedules of the United States (TSUS). For purposes of this report, the data for 1986-88 were converted to HTS categories, and are therefore estimates.

<sup>3</sup> U.S. merchandise foreign trade data are collected by the Customs Service and compiled and published by the Bureau of Census, and are referred to as Census-basis trade. Census-basis merchandise trade is adjusted by the Bureau of Economic Analysis (BEA) for inclusion in their Balance of Payments (BOP) statistics. These adjusted data are referred to as BOP-basis merchandise trade.

<sup>4</sup> In two sections: "U.S. trade with the U.S.S.R. and selected Eastern European countries," and "U.S. trade with selected other countries," many charts where data are broken out by product sector are small enough to require analysis in millions, rather than billions of dollars. In such cases, the charts are marked as valued in millions of dollars.

of numerical rounding (usually at the billions of dollars level), some totals and percentages presented graphically may not equal those derived directly from data presented in appendixes A through C.

The following tabulation defines the economic regions used in CHARTBOOK.

- Poland
- Romania
- U.S.S.R.
- Yugoslavia

<sup>1</sup> Data on Germany for the years 1986-89 include data for West Germany only. For 1990, however, fourth-quarter GDR trade statistics are included in trade with Germany and the EC.

<sup>2</sup> Full-year data for the GDR are presented for the years 1986-89. For 1990, however, data are included for the first three quarters only. Fourth-quarter 1990 data are included in trade with Germany and the EC.

Trade data are presented according to broad product sector groupings: Food, manufactured goods, fuel and raw materials, and all other goods. These groupings are based on the Standard International Trade Classification (SITC), revision 3. The following tabulation presents the SITC section categories included within each product sector grouping.

<b>Food</b>	<b>Manufactured goods</b>

### **Layout**

The first section of CHARTBOOK is an overview of U.S. trade with the world, followed by sections concerning U.S. trade with five economic regions and all other countries. Each region is further subdivided into trade with four leading countries in that region.

Each regional section contains the following information:

- A table highlighting the leading U.S. exports and imports with that country grouping in 1990
- A bar graph indicating the share of total U.S. trade, by product sector, with that country/grouping in 1990
- A bar graph indicating U.S. exports, imports, and trade balance with that country/grouping from 1986-90
- Two pie charts indicating the composition, by product sector, of trade with the United States in 1990
- Four bar graphs indicating U.S. exports, imports, and trade balance, by product sector from 1986-90
